

INTERNATIONAL ORGANIZATION FOR STANDARDIZATION ISO

INTERNATIONAL ORGANIZATION FOR STANDARDIZATION (ISO) is an independent, non-governmental international organization that develops and publishes international standards. ISO was founded in 1947 by the merger of the International Union of Pure and Applied Chemistry (IUPAC) and the International Federation of Standardization (IFSI).

ISO is a non-profit organization with a membership of over 120 national standards bodies. Its primary objective is to develop and promote international standards that facilitate trade and the development of international trade. ISO standards are developed through a process of consensus among its member bodies.

ISO standards cover a wide range of subjects, including technology, manufacturing, and services. They are developed through a process of consensus among its member bodies, which are represented by national standards bodies. ISO standards are developed through a process of consensus among its member bodies.
